

## Find the perfect sunglasses size for your face with our easy-to-use sunglasses sizing guide.

1. Look into a mirror
2. Hold a ruler horizontally across your face
3. Measure the distance between your left and right temples

4. Then use the chart below to convert your measurement to a frame size that may suit your face.

| <b>Suggested Frame Size</b> | <b>Face Size (temple to temple)</b> |
|-----------------------------|-------------------------------------|
| 52mm                        | 127mm                               |
| 55mm                        | 135mm                               |
| 57mm                        | 140mm                               |
| 58mm                        | 146mm                               |
| 61mm                        | 152mm                               |
