

New! Zulu 3 ANR Headset with Bluetooth®

The most comfortable, most durable headset LightSpeed has ever made.

Zulu 3 is backed by an industry-best 7-year warranty.

What makes the new Zulu 3 superior to its competitors?

More comfortable

- Performance ear seals are tapered to provide a more natural fit, for greater comfort and stability
- Plush ear seals provide 20% more surface area than competitors, for a better seal around glasses frames and a more comfortable distribution of side pressure
- Larger cup cavity provides 50% more space for your ears, allowing the entire ear to fit comfortably inside, while preventing the pain caused by seals pressing against the edge of the ear
- Low-profile stainless steel headband follows the curve of the head for more comfortable distribution of weight and side pressure

More durable

- New rugged cables built around a Kevlar core deliver more strength and flexibility with less weight than standard cables
- Nearly 100% of the headset is made from stainless steel and magnesium
- Magnesium ear cups are both strong and light, while delivering superior high-frequency noise attenuation

More clarity

- The Dual Aperture Disc™ microphone provides greater noise cancellation for clearer, more intelligible communications
- Exclusive, user-adjustable mic gain helps balance loud and soft voices in a multi-headset environment
- Front Row Center™ (FRC), stereo cross-feed technology, and redesigned speakers deliver crisp, rich audio and unparalleled music fidelity

Lightspeed performance

- Award-winning active noise cancellation (ANR) delivers consistent performance over a deep, broad range of low frequency noise
- Zulu preferred 3 to 1 over our nearest competitor by professional pilots who flew with both
- Zulu 3 is backed by an industry-best 7-year warranty

New! Zulu 3 ANR Headset with Bluetooth®

Like the Zulus that came before it, Zulu 3 is packed with advanced features:

Bluetooth® connectivity — Enjoy excellent call clarity, music fidelity, and wireless access to critical audio alerts from aviation apps on mobile devices.

FlightLink compatible

— Capture and retrieve incoming and outgoing communications with Lightspeed's free FlightLink recording app for the Apple® iPad® and iPhone® via the supplied patch cable.

Cell phone/music connection — An integrated control box auxiliary input offers an additional option for connecting a cell phone, music player or other audio device.

Auto Shutoff™ — Lightspeed's proprietary Auto Shutoff feature saves battery life by automatically shutting down the headset power when not in use.

ComPriority™ — Never miss important radio communications with patented ComPriority, which lowers the volume of any auxiliary device automatically during radio or intercom transmissions.

30-day money back guarantee — Lightspeed Aviation headsets are designed to be the best available anywhere, for any price. But we know that every cockpit and pilot is different. That's why we offer a 30-day money back guarantee. If you are not completely satisfied with your purchase for any reason, return the product for a full and prompt refund.

7-year limited warranty
